ARTGHVINO KVEVRI WINES

ქვევრის ღვინო არტღვინო

These wines are produced using age old Georgian winemaking technique, which in 2013 was included in the representative list of the intangible cultural heritage of humanity. Kvevri wines ferment and mature naturally in clay (kvevri) pots under the ground. This method gives Artghvino wines it's distinct taste and aroma. Grapes for this wine come from the so-called tsarapis zone, which is a philosophy of growing grapes just as nature intended – no additional water, fertilizers or other chemicals, meaning the harvest depends solely on the weather conditions of that particular season.
